Lyon, France

KEY FIGURES

- > The association includes over 8,500 employees and 27 member organizations, all stakeholders in the Vallée de la Chimie

ACTIVITIES

The ADDVC, founded in 2007 at the initiative of Lyon Metropole, has the role of bringing together all the stakeholders in the Vallée de la Chimie and of encouraging any initiative promoting a better quality of life for those working and living in the Vallée, as well as the harmonious and sustainable development of the territory.

Since its inception, the association can be credited for an increased dynamic in transport in the Vallée with the creation of inter-company travel plans, a car-sharing platform, the introduction of new soft transport modes (in particular cycling) and support for the Atobus lines in collaboration with Sytral. In 2013, it set itself the task of promoting the actions of its members and players in the Vallée by creating the first Sustainable Development Observatory in the Vallée de la Chimie. This annual report compiles and presents the actions and good practices of industrials in the Vallée.

The objective: to demonstrate, by example, the enormous dynamism of the Vallée's stakeholders and their intention to make this territory a model of sustainable development. Regarding pooling of services, it has initiated trials of concierge services and crèches with certain industrials in the economic area.
