

## HEAD OFFICE

**Lyon, France**

## KEY FIGURES

- > 10,000 interns per year
- > 350 apprentices per year
- > 6 million euro budget
- > More than 100 training courses available on a national level

## ACTIVITIES

INTERFORA IFAIP is a training and consulting center for the chemical and process industries, created by a group of chemical industrials in order to respond to a shortage of qualified manpower. Today, INTERFORA IFAIP has close links with the industrial processing world: chemicals, pharmaceuticals, cosmetics, bio-industry, plastics, water treatment, paints, etc.

INTERFORA IFAIP has a technical platform shared by two fields of business:

- > A learning center welcoming apprentices from NVQ to engineer on site or in partner establishments in the Auvergne-Rhône-Alpes region;
- > Continuing education and consulting on Health and Safety, Techniques and Processes, diploma courses, Management and Improvement of company performance, and training methodology.

### Counseling

INTERFORA IFAIP trainers all have experience in processing industries. They understand the technical dimensions of the jobs and their background allows them to grasp the organizational and human complexity of companies. As they know how to bring out human potential, they are good at accompanying change.

### Training to transform people and organizations

Training is changing, and career paths are becoming less linear. Periods of employment are followed by periods of re-training. INTERFORA IFAIP designs and develops systems and implements resources to welcome all kinds of public: groups or individuals, newcomers or active employees. It creates solutions specific to each request.

INTERFORA IFAIP invests in educational innovation: individualized career paths, skill and professional behavior assessment charts, e-learning systems, virtual and augmented reality, etc.

INTERFORA IFAIP gives meaning to work.

Our teams diagnose, evaluate, stimulate, mobilize, accompany and train. Their objective is to articulate company performance and employee development:

- > for employees: taking charge of their professional lives;
- > for companies: improving their results.
