

HEAD OFFICE

Paris, France

KEY FIGURES

- > 80,000 employees, 70 countries, production of 7.4 billion m³ of drinking water, waste collection for 32 million people, 5 138 GWh of energy produced from waste every year around the world
- > 2017 turnover: 15.87 billion euros

ACTIVITIES

Across the world, SUEZ provides its clients (local authorities, industrial businesses, consumers) with concrete solutions to meet the new challenges of resource management.

Water, secondary raw materials and energy are essential to the growth of human activities:

- > SUEZ provides smart services to optimize water management and develops alternative water resources by wastewater recycling and desalination.
- > SUEZ collects and eliminates waste and promotes the recycling of waste for the production of secondary raw materials and renewable energy.
- > SUEZ offers innovative consulting solutions for the sustainable development of cities and territories.
- > SUEZ has four areas of expertise:
 - > Water.
 - > Recycling and waste recovery.
 - > Water treatment.
 - > Consulting.

Lyonnaise des Eaux, Sita, Degrémont and all the group's subsidiaries were renamed SUEZ in 2015.
