- > Capital of the OSER ENR fund:
19.5 million euros
- > Invested in over
15 renewable
energy projects
since 2015

ACTIVITIES

OSER ENR, Operator of Regional Energy Services, is an investment fund specializing in renewable energies in the Auvergne-Rhône-Alpes region. OSER ENR, the first venture capital company dedicated to this type of investment, is based on original public-private co-financing involving the Regional Council, Caisse des Dépôts and 8 private partners from the region. With a capital of nearly €19.5M and more than fifteen financed projects, OSER ENR continues its investments.

Intended to support decentralized renewable energy projects (solar, methanisation, hydro, wind, biomass), the fund works with all types of project initiators (local authorities, developers, energy industrialists, citizens) to enable the development of renewable energy production facilities.

As a major player in the region, OSER ENR contributes to the emergence of renewable energy projects at a regional level. The OSER fund offers a financing opportunity that allows project initiators to:

- > strengthen equity capital,
- > obtain long-term commitment,
- > have a local partner,
- > benefit from transversal project support.

OSER ENR IN LYON VALLÉE DE LA CHIMIE

OSER ENR is part of the Appel des 30! operational committee.

As part of the Appel des 30! 2016 edition, OSER ENR supported the project of installing solar panels on roofs and shades on manufacturing buildings in the Vallée de la Chimie.
